

Affordable entertainment without compromise

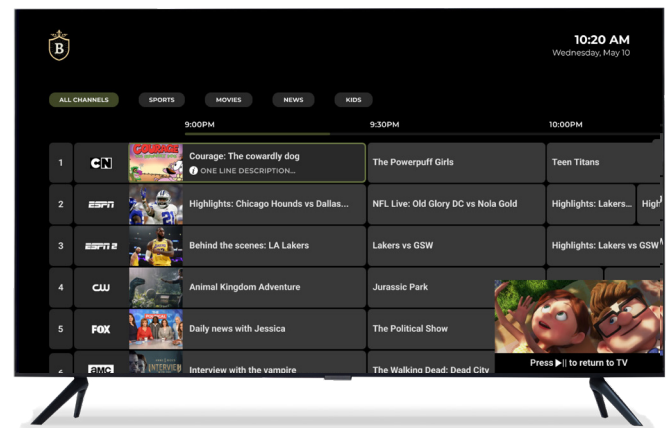

Simple entertainment doesn't have to feel outdated.

OnStream by DISH Business is setting a new standard for senior living entertainment. With a fully customizable feature set, communities can now tailor entertainment experiences to meet residents' specific needs and even offer different experiences within the same property. Best of all, this technology is compatible with nearly any wiring infrastructure and works seamlessly with your community's existing televisions.

An HD experience ideal for seniors

DISH Business worked closely with industry experts to design a simple, yet high-quality entertainment experience that caters to the unique needs of residents.

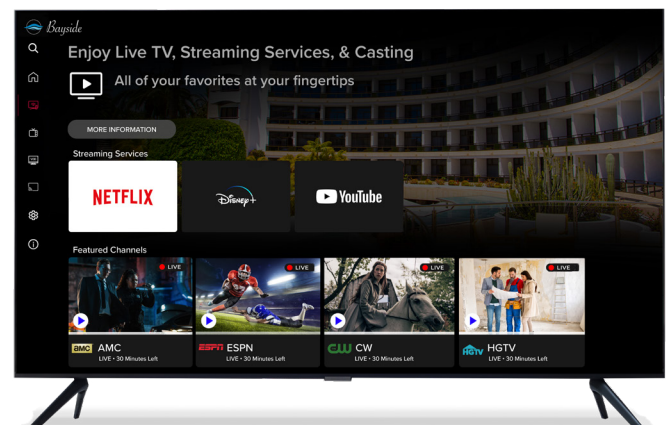

- **Interactive guide** is easy to use and responsive, and includes channel numbers and logos
- **Community channels** are seamlessly integrated into the channel guide
- **High-definition picture quality** lets residents enjoy movies and shows with enhanced clarity
- **40% larger text allows** for bigger captions and an easy-to-read guide

Unlock modern entertainment options

For residents who are more tech-savvy, communities can opt to integrate modern entertainment features that promise to delight both residents and their visiting families.

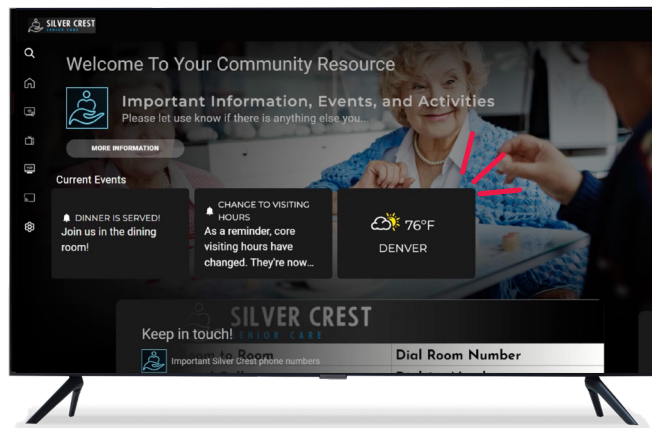

- **Streaming** from popular apps
- **Casting** to TVs from personal devices like tablets or smartphones
- **Universal search across applications, genre filtering, and favorites** help residents find their preferred live TV and on-demand content

Turn TV into a community builder with advanced functionalities

OnStream's entertainment features are just the beginning. Its fully customizable user interface allows communities to tailor the on-screen experience to their residents' unique needs.

- Community info module highlights dining menus, group events and activities, reminders, and more within the TV interface.
- Customizable advertising spaces allow communities to partner with local businesses, like golf courses and restaurants, to promote discounts to residents.
- On-screen notifications keep residents up to date on area-specific maintenance or floor-specific amenities.
- Weather app integration helps residents keep tabs on local conditions
- The best part? Communities have the flexibility to choose different interfaces and entertainment feature sets throughout the property.

Don't choose between quality and affordability

OnStream enables communities to deliver the highest-quality entertainment experience—plus additional community features—at a budget-friendly price point.
